Conference Theme - Megatrends

This conference theme leads us to look outside our water sector bubble at the megatrends that are occurring or are coming from over-the-horizon. There is value in periodically lifting our collective heads and looking at the world around us to gain an understanding of what is changing.

How will these trends impact our future services, activities and plans? How can we be prepared and adapt?

IWA Strategy Workshop

Breaking from the megatrend theme, the last session of the day is a workshop to help shape the future of the IWA. We look forward to your input into this important process.
