Conference Theme

**From Uncertainty to Action:
Building an AI Ready Workforce**

As the water industry faces rising uncertainty—from climate extremes to shifting demographics and policy—the future of our workforce depends on its ability to adapt, innovate, and lead.

“From Uncertainty to Action: Building an AI Ready Workforce” puts a spotlight on the transformational role of artificial intelligence including automation, data analytics
Generative AI in reshaping how we manage water, make decisions, and develop skills.

This conference will explore how you can harness these tools to build resilience—not only in infrastructure and systems, but in people. We'll delve into the practical implications of AI for the sector, highlight the emerging skillsets needed across all levels, and discuss how to future-proof careers in an era of rapid change.

Novotel Geelong
